

Bug Reports

Movie App · Manual QA Testing

QA Engineer: Vitalii Savonenko · Total: 4 bugs

Bug Report #1

Application crashes after scrolling the Movies list several times

Severity: **Critical**

DESCRIPTION

The application crashes when the user scrolls the Movies list several times. After several long scroll actions, the application unexpectedly closes and returns to the device home screen.

STEPS TO REPRODUCE

1. Open the application.
2. Log in with any credentials.
3. On the Movies screen, scroll down the list of movies several times (about 3 long scrolls).

Actual Result: The application crashes and returns to the device home screen.

Expected Result: The Movies list should scroll normally without causing the application to crash.

Bug Report #2

Blank screen displayed after applying Year filter with no matching movies

Severity: **Major**

DESCRIPTION

When applying the Year filter and selecting the year 2000, the Movies screen becomes completely blank. No movies are displayed and the application does not show any message indicating that no results were found. As a result, the user receives no feedback and may think the application is not working.

STEPS TO REPRODUCE

1. Open the application.
2. Log in with any credentials.
3. On the Movies screen tap the filter icon in the top right corner.
4. In the Select filter popup choose Year.
5. Select the year 2000.

Actual Result: The Movies screen becomes empty and no message is displayed.

Expected Result: If no movies match the selected filter, the application should display a message such as «No movies found».

Bug Report #3

Duplicate «War» genre option is displayed in Genre filter

Severity: **Minor**

DESCRIPTION

In the Genre filter, the option «War» is displayed twice in the list of available genres.

STEPS TO REPRODUCE

1. Open the application.
2. Log in with any credentials.
3. On the Movies screen tap the filter icon in the top right corner.
4. In the Select filter popup choose Genre.
5. Observe the list of available genre options.

Actual Result: The «War» genre appears twice in the Genre filter list.

Expected Result: Each genre option should appear only once in the filter list.

Bug Report #4

Typo in login screen title («Log im» instead of «Log in»)

Severity: **Trivial**

DESCRIPTION

On the login screen the title is displayed as «Log im» instead of «Log in».

STEPS TO REPRODUCE

1. Open the application.
2. Navigate to the login screen.
3. Observe the title text at the top of the screen.

Actual Result: The login screen title reads «Log im».

Expected Result: The login screen title should read «Log in».
